

# Girls in STEM Competition

What will you create? Think big. Think small. Think about how you can build a better world. We're hosting a STEM Competition to challenge your brains. Creations should be an original design and related to energy and environment, health and nutrition, or biomedical. You should include a hypothesis and a visual aid of your concept – a video, tri-fold display, poster, model or anything that best conveys your innovation. You can work individually or in groups of four or less.

**5:30 - 7:30 p.m.**

**Feb. 22 Presentations**

Students from Colorado School of Mines outreach program designed for girls (DECTech Students) will judge the competition.

Winners will be honored at the International Women's Day Luncheon on March 8 at the Denver Marriott West.

All contestants will receive a certificate of participation.

**Suitable for: Girls in grades 5-8**
